Why cloak your affiliate links?

It's a fact that any affiliate can replace your affiliate ID by removing a few characters from the link and replacing them with their affiliate ID.

In a way they hijack your affiliate link and that is one of the ways to lose affiliate commissions.

By cloaking your affiliate link, your actual affiliate ID becomes invisible for the visitors and other affiliates. In fact, the page you create is scrambled with code and there is no way in which your affiliate link can be made visible.

The software creates a page which redirects the visitor to the merchant. When the visitor buys you will receive an affiliate commission, because your affiliate link is embedded in the content of the page.(invisible)

But it gets better...

The software has an advanced cloaking feature that enables you to choose the page where you want to send the visitor to.

*If the merchant only displays a squeeze page to make the visitor opt in prior to purchasing the product or service,this feature will enable you to send the visitor directly to the salespage.

*Or if you think the product is of very good quality, but the merchant uses a crappy salespage, ...this feature will enable you to send visitors to the order page.

*Or you send the visitor to a salespage YOU created and then to the orderpage.

Download

You can download Advanced Affiliate Link Cloaker by clicking on the link below:

[Advanced Affiliate Link Cloaker](#)

Install

- *Unzip the **alc.zip** file
- *Double click the cloaker tool setup icon
- *follow the instructions
- *and you're ready to Rock 'n Roll!

Link Cloaker Tool Instructions

Simple Cloak: This is a simple and direct link cloaking method.
(your affiliate link cannot be seen in the code-view, it is scrambled with code)

1. Enter the affiliate link you would like to cloak.
2. Enter the page title you would like to use.
3. Click on 'Create Page' and save the file according to how you want your link to be cloaked.

For instance, if you want to cloak a link as <http://www.domain.com/productname.htm>, save the file as 'productname.htm'.

Once the page is created, upload to your server via FTP.

Advanced Cloak: This allows you to cloak your links stealthily and enable you to redirect your traffic to whichever URL you want and still get credited for your commissions because of the cookie placed.
Furthermore, the URL in the address bar will change accordingly to the one you've indicated, hence people may not even notice it's an affiliate link. Very powerfull!!

1. Enter the affiliate link you would like to cloak.
2. Enter the display URL or chosen destination of your choice.
3. Click on 'Create Page' and save the file according to how you want your link to be cloaked. Thereafter, upload to your server.

Some suggestions for using advanced cloak:

1. If your merchant leads people to their squeeze page first, you can bypass it by entering the sales page directly instead.
2. If you have presold your list before and would like to bypass the sales page altogether, use the advanced cloak to cloak the order link and direct your list to order straight away.

You have the right to give away the Advanced Affiliate Link Cloaker:

Some suggestions for giving away the software:

*Use the software as an incentive to encourage visitors to give you their email address
A great way to build your list!

*give it to your members on paid membership sites

*give it to your members on free membership sites

Give away instructions:

If you want to give away this software. You do this by simply giving a Rebranded PDF to your members, subscribers, etc....

There are 2 options:

- You give away the report without changing the Name and URL.
- You rebrand the report with YOUR NAME and YOUR WEBSITE URL, which means traffic to your website...

PDF branding instructions:

Watch this [video](#) or read the instructions below

There's a rebrander setup-file in the folder.

You install the rebrander by double clicking on the icon of the rebrander setup-file.

Once the rebrander is installed the rebrander will automatically open.

You don't need the existing PDF for this! The rebrandable PDF is part of the rebrander.

*At the top there's a button 'Load branded PDF' . Click on that button.

You will see the information appear in the fields on the main window.

*What you need to do is fill in 'Edit custom values' according to the 'Tagged text and links'
So, if the 'Tagged text and links' says ' \$\$your-name-here\$\$' then you fill in your name in the 'Edit custom values' field.

*To make a 'custom' field active click once to make it 'gray' and then once to make it active.

*In the PDF there are 2 custom values:

\$\$your-name-here\$\$ ---> put your name in the custom field

\$\$your-website-url\$\$ ---> put www.yourdomain.com (without the http://)

Then 'save' the rebranded PDF to the folder of your choice and upload the PDF to your server via FTP.

Share the link of your rebranded PDF with the people you want to give the software.

To your success,

Rudy Dhondt
